- Includes DBD-ci Digital Receiver
- Sky / Freesat box can be connected via loop through
- Receiver case 1 DIN in-dash
- Remote control sensor extension
- Automatic skew control (option)
- Auto close-down with contact connection
- Freesat ready

Description:

Neta Motosat is designed to receive the satellite broadcasts for stationary vehicles.

The system finds and locks to the satellites automatically with two axis control of azimuth and elevation motors.

The system runs on 12v or 24v and uses less than 2.5 Amps when searching and 1 Amp when the satellite has been located. (as receiver built-in)

It can pick up TV & radio all over Europe thanks to its ability to find all satellites (Receiver pre-stored for Astra 2, Astra 1, Hotbird, Türksat). A SKY digibox can be connected to the system.

(as with any satellite TV system, what you receive will depend on where you are and what type of receiver you use)

Specification:

Operating voltage: 12v DC

Dish type: Off-set dish

Dish size: 68cm

L.N.B. type: Universal

Mounting method: Fixes to roof with Sikaflex and / or screws.

Dish colour: White (can be painted any colour)

Search method: System can be used whilst vehicle is stationary.
